sonrt规则:

```
alert http any any -> $HOME_NET any (
  msg:"MineAdmin - Logic Flaw Vulnerability via /system/refresh";
  flow:to_server,established;
  http.method; content:"POST";
  http.uri; content:"/system/refresh";
  http.header; content:"Authorization: Bearer";
  http.header; content:"Content-Type: application/json;charset=UTF-8";
  metadata:
    service http,
    affected_product "MineAdmin企业级后台管理系统",
    vulnerability_type "Logic Flaw Vulnerability",
    severity "medium";
  classtype:policy-violation;
  sid:1000579;
  rev:1;
  priority:2;
)
```

## 漏洞修复

---

在 refresh方法上强制校验 JWT 签名。
